The US Department of Commerce creates the conditions for economic growth and opportunity
Commerce agencies are among the biggest contributors to the open data movement.
Just from one instrument on one of our satellites, we collect, process and disseminate >2.5 TB per day.
• Development
• Education
• Data Science
we Deliver
we Consult
we Train
we Partner
we Procure
purpose

promise

performance
communication, collaboration, agile and lean, user-centered design, outcomes-driven, and open
Scoping for awesomeness
Access to the field, actionable resources, reason for existence, ethical intervention, defensible yet accessible, and sustainable
